

### **Welcome to Percy Williams and Sons Ltd, builders of New Homes in Cornwall.**

Percy Williams and Sons has been trading for three generations under guiding principles of quality and value. Rather than working on a large scale, we at Percy Williams have concentrated on finding and developing small to medium-sized sites to create high quality new homes with character and integrity. In other words, buildings that are great to live in, part of the local Cornish community, and yet also, at the cutting edge of technology and design.

### **Savings on house purchase by buying direct.**

We build a wide range of property for all budgets, from first-time buyer flats to larger family homes. As we don't build on a large scale, we are able to deal with you directly. Selling our homes direct offers significant savings, as well as maintaining a close relationship between us, the builders of your new home and you, the purchasers. For more information about our houses please visit [houses for sale in Cornwall](#) page.

### **Passionate about Green Building design.**

We have pushed the boundaries of green building technologies at [Fairglen, Hayle](#) , where the running costs are a fraction of those in conventional homes. Here we have demonstrated our commitment to lessening our impact on the environment based on a high standard of modern architecture alongside an exceptionally low carbon footprint.

We are passionate about our buildings and about creating the best new homes in Cornwall, and hope you will be inspired by them as well.
